

DUAL HEATING ELEMENT

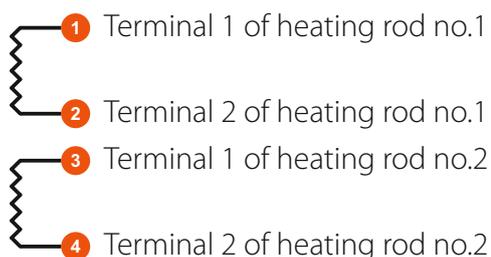

UNITES

For photovoltaic applications

Heating element consist of two U-shaped heating rods. Heating element is designed for heating of water or similar liquids. AC section of the heating element is designed for power 2200W / 23VAC and DC section for power 2500W/230VDC.

WIRING

DESCRIPTION

- AC / DC „dry” heating element ■
- Independent two heating sections ■
- Connected via M4 threads ■
- Intended for heating liquids ■

APPLICATIONS

- Systems for photovoltaic water heating ■
- Other applications with DC voltage ■

SPECIFICATIONS

AC

- Power 2 200 W ■
- Resistivity 24 Ω / section ■
- Voltage 230 VAC ■

DC

- Power 2 500 W ■
- Resistivity 21 Ω / section ■
- Voltage 230 VDC ■

- Length 420mm ■
- Diameter 60 / 45mm ■
